## Table of Contents

ii Arizona Counties
iii Introduction
iv Population of Major Arizona Cities, Towns and Places

1 Population
2 Labor Force
3 Agriculture
4 Mining
5 Manufacturing
6 Construction
7 Construction Awards
8 Transportation, Communications and Public Utilities
9 Services and Finance, Insurance and Real Estate
10 Retail Trade Sales
11 Trade
12 Government

Travel and Tourism

13 Interstate Traffic
14 Northern Arizona Highway Traffic
15 Southern Arizona Highway Traffic
16 Northern Arizona Visits to Parks and Other Recreation Areas
20 Southern Arizona Visits to Parks and Other Recreation Areas

International Border Crossings

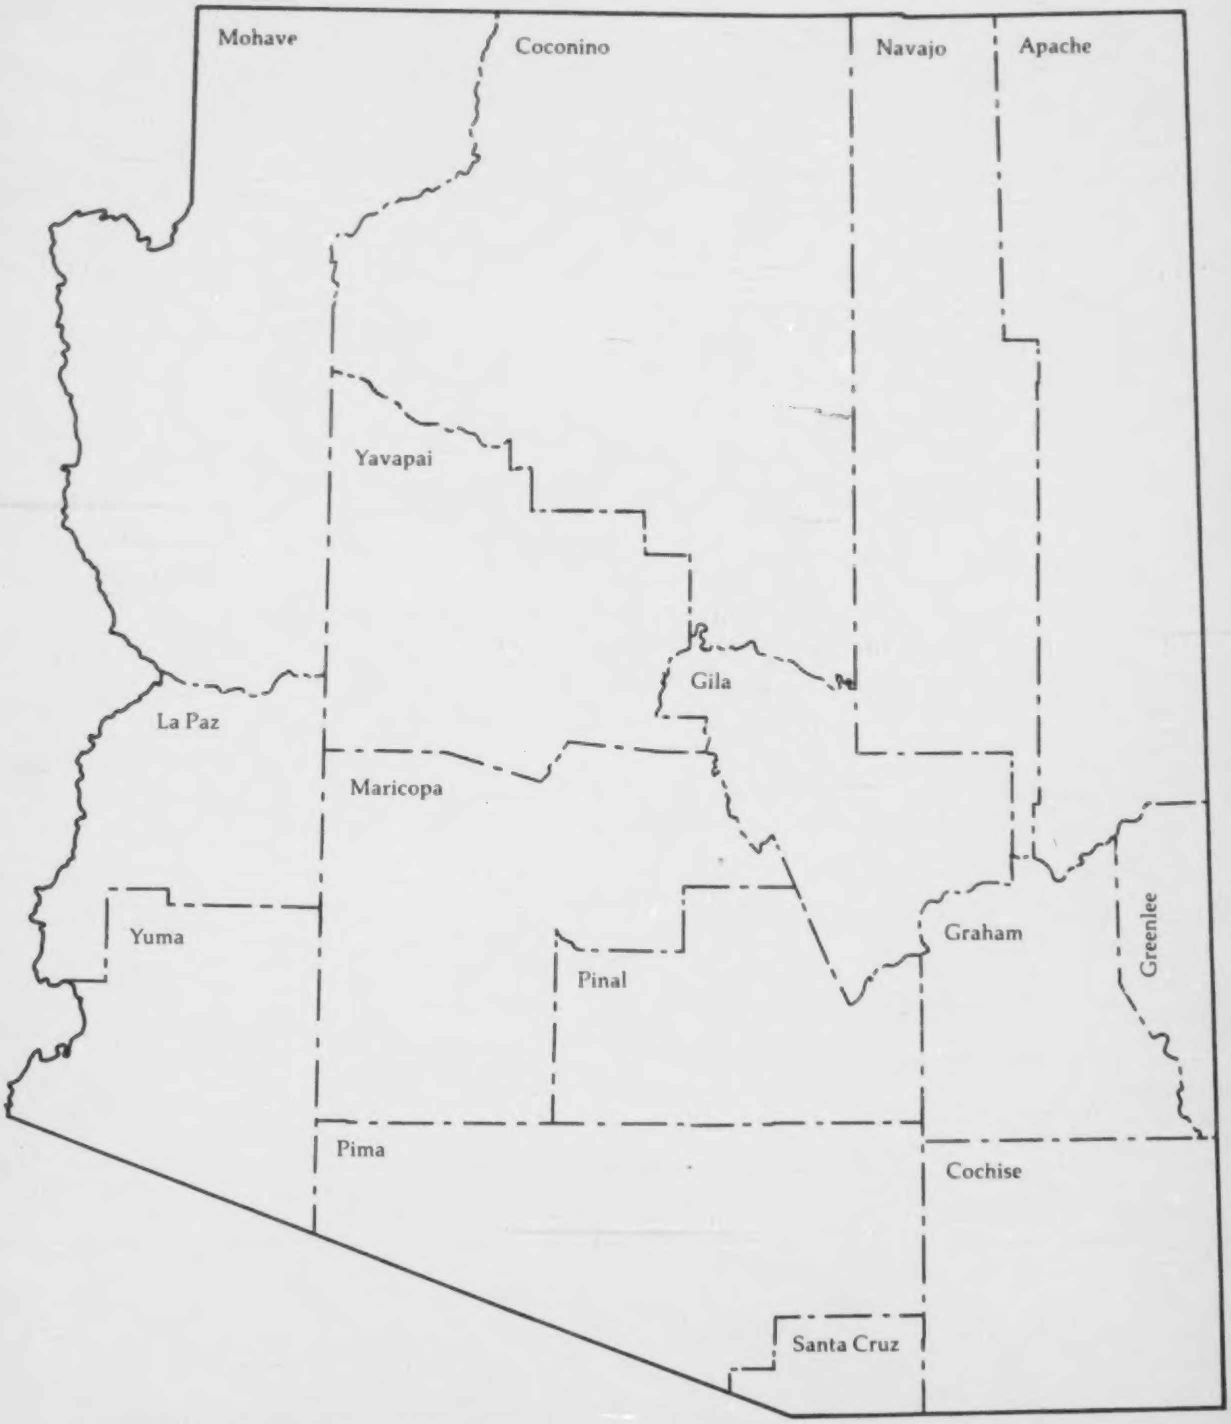
24 Persons
26 Persons and Vehicles
27 Population, Civilian Labor Force, Employment and Unemployment
28 Construction
29 Construction Awards
30 Retail Trade Sales
31 Employment-Miscellaneous Industries
32 Multiple Listing Real Estate Sales
34 Transportation

Tucson Metropolitan Region (Pima County)

35 Population, Civilian Labor Force, Employment and Unemployment
36 Mining and Construction
37 Construction Awards
38 Retail Trade Sales
39 Employment-Miscellaneous Industries
40 Multiple Listing Real Estate Sales and Transportation

Non-Metropolitan Counties

41 Apache County
42 Cochise County
43 Coconino County
44 Gila County
45 Graham County
46 Greenlee County
47 Mohave County
48 Navajo County
49 Pinal County
50 Santa Cruz County
51 Yavapai County
52 Yuma and La Paz Counties



Mohave
Coconino
Navajo
Apache
Yavapai
Gila
La Paz
Maricopa
Yuma
Pinal
Graham
Greenlee
Pima
Cochise
Santa Cruz

# Introduction

Data are organized in five major groups. The first includes general indicators of growth for Arizona (such as population and labor force) and industrial indicators. Industrial indicators are arranged in accordance with the Standard Industrial Classification (SIC) system developed by the Office of Management and Budget, Washington, D.C.

The second group of indicators deals with travel and tourism. These are not grouped on a statewide basis because Arizona experiences two distinct seasons for economic activity in the tourism "industry" —summer, in the northern part of the state, and winter in the southern areas.

The third and fourth groups of data are similar, pertaining to the Phoenix metropolitan region and Tucson metropolitan region. Sub-categories for each adhere to the pattern developed for the state as a whole, but include only those sectors of relevance within the region. For example, mining is covered extensively in the Tucson section because of widespread copper mining activities in the surrounding area, but is not included for Phoenix where mining is limited to local sand, gravel and stone quarrying operations.

The final group contains tabular material for each of the non-metropolitan counties, with the exception of Yuma and La Paz counties. Since the latter officially became a separate county on January 1, 1983, insufficient historical data exists to present it separately. The same applies to the newly constituted Yuma County. Until a meaningful time-series can be developed for each county, the data will be combined.

Data are presented in several formats. Almost 540 time-series have been assembled and presented in tabular form. These are arranged on an annual basis from 1979. (The data bank is arranged monthly and extends to 1970 when possible.) In addition to the annual figures, recent data from the past 12 to 15 months are arranged monthly. When appropriate and particularly for summary variables, data are listed both in unadjusted and seasonally adjusted forms. Most seasonally adjusted data were calculated by DEBR using the X-11 program developed by the U.S. Department of Commerce. An exception is the seasonally adjusted unemployment rate, received directly from the Arizona Department of Economic Security. All annual data (unadjusted and seasonally adjusted) are essentially the same because seasonality is not a factor.

Monetary data are shown in thousands of dollars ($000). In a number of cases, data are included not only in raw terms (unadjusted), but also seasonally adjusted and deflated, i.e., converted to constant dollars. Others have been converted to constant dollars only when seasonal factors are not reliable for further adjustment. Appropriate deflators used in the conversions vary with the particular series and are noted on the tables.

A few changes have been made since the publication of the first edition. Some were suggested by users in the interests of clarity, and have been addressed with footnotes. Other alterations were necessitated by changes in data presentation by original sources. For example, the Multiple Listing Service (MLS) real estate data in Maricopa County are no longer shown by city or cities within the county, but are presented by geographic areas within the region. This will eliminate double counting of MLS data. Several additions also have been made. Vehicle crossings data at six U.S.-Mexico border cities have been added. More data are now presented both in unadjusted and seasonally adjusted form. Taxable sales in construction also were added for non-metropolitan counties.

Selected charts have been developed for the state and Phoenix and Tucson metropolitan areas, highlighting a particular time-series from the tabular data on each page. Once again a mix of unadjusted, seasonally adjusted, seasonally adjusted and deflated variables, and moving averages have been selected for visual inspection. These are plotted monthly for the most recent six-year period. While most charts include a single plot, others have several; a few sum the areas between plots to give some indication of the changing shares of total activity. A legend provides necessary explanation.

As in the past, this edition of *Arizona Economic Indicators* may be kept current through reference to *Arizona's Economy*, a monthly publication of the Division of Economic and Business Research. To be placed on the mailing list, call (602) 621-2155.

While every effort has been made to make this edition as comprehensive as possible, the result is not exhaustive. For persons requiring additional detail, *Indicators* will serve as a reference to further collections of data.

*Nat de Gennaro*

# POPULATION OF MAJOR ARIZONA CITIES, TOWNS AND PLACES
## Listed in Rank Order for July 1, 1987

| 1987 Rank | 1980 Rank | Name | Number |
|---|---|---|---|
| 1 | 1 | Phoenix | 927,965 |

# Introduction

Data are organized in five major groups. The first includes general indicators of growth for Arizona (such as population and labor force) and industrial indicators. Industrial indicators are arranged in accordance with the Standard Industrial Classification (SIC) system developed by the Office of Management and Budget, Washington, D.C.

The second group of indicators deals with travel and tourism. These are not grouped on a statewide basis because Arizona experiences two distinct seasons for economic activity in the tourism "industry" —summer, in the northern part of the state, and winter in the southern areas.

The third and fourth groups of data are similar, pertaining to the Phoenix metropolitan region and Tucson metropolitan region. Sub-categories for each adhere to the pattern developed for the state as a whole, but include only those sectors of relevance within the region. For example, mining is covered extensively in the Tucson section because of widespread copper mining activities in the surrounding area, but is not included for Phoenix where mining is limited to local sand, gravel and stone quarrying operations.

The final group contains tabular material for each of the non-metropolitan counties, with the exception of Yuma and La Paz counties. Since the latter officially became a separate county on January 1, 1983, insufficient historical data exists to present it separately. The same applies to the newly constituted Yuma County. Until a meaningful time-series can be developed for each county, the data will be combined.

Data are presented in several formats. Almost 540 time-series have been assembled and presented in tabular form. These are arranged on an annual basis from 1980. (The data bank is arranged monthly and extends to 1970 when possible.) In addition to the annual figures, recent data from the past 12 to 15 months are arranged monthly. When appropriate and particularly for summary variables, data are listed both in unadjusted and seasonally adjusted forms. Most seasonally adjusted data were calculated by DEBR using the X-11 program developed by the U.S. Department of Commerce. An exception is the seasonally adjusted unemployment rate, received directly from the Arizona Department of Economic Security. All annual data (unadjusted and seasonally adjusted) are essentially the same because seasonality is not a factor.

Monetary data are shown in thousands of dollars ($000). In a number of cases, data are included not only in raw terms (unadjusted), but also seasonally adjusted and deflated, i.e., converted to constant dollars. Others have been converted to constant dollars only when seasonal factors are not reliable for further adjustment. Appropriate deflators used in the conversions vary with the particular series and are noted on the tables.

A few changes have been made since the publication of the first edition. Some were suggested by users in the interests of clarity, and have been addressed with footnotes. Other alterations were necessitated by changes in data presentation by original sources. For example, the Multiple Listing Service (MLS) real estate data in Maricopa County are no longer shown by city or cities within the county, but are presented by geographic areas within the region. This will eliminate double counting of MLS data. Several additions also have been made. Vehicle crossings data at six U.S.-Mexico border cities have been added. More data are now presented both in unadjusted and seasonally adjusted form. Taxable sales in construction also were added for non-metropolitan counties.

Selected charts have been developed for the state and Phoenix and Tucson metropolitan areas, highlighting a particular time-series from the tabular data on each page. Once again a mix of unadjusted, seasonally adjusted, seasonally adjusted *and* deflated variables, and moving averages have been selected for visual inspection. These are plotted monthly for the most recent six-year period. While most charts include a single plot, others have several; a few sum the areas between plots to give some indication of the changing shares of total activity. A legend provides necessary explanation.

As in the past, this edition of *Arizona Economic Indicators* may be kept current through reference to *Arizona's Economy*, a monthly publication of the Division of Economic and Business Research. To be placed on the mailing list, call (602) 621-2155.

While every effort has been made to make this edition as comprehensive as possible, the result is not exhaustive. For persons requiring additional detail, *Indicators* will serve as a reference to further collections of data.

*Nat de Gennaro*
